

Supporting existing companies

[1]

The Chamber of Commerce supports local commercial activities with outright grant aids so they can achieve their exact objectives, such as the improvement of organisational models, management controls, the development of human resources, environmental and safety measures, internationalisation, etc.

We also support the organisation of trade show events in the province, as well as the participation in trade shows outside the province.

Regional projects have been devised in order to strengthen the economic and productive system of specific areas in the province and to boost their competitiveness. They are aimed at aspiring/new entrepreneurs and businesses from all economic sectors.

Entrepreneurs receive support during the start-up phase of their business thanks to guidance seminars, specific training and individual assistance, while the businesses are supported through targeted check-ups and personalised expert advice, to help them along the path towards growth, consolidation or a competitive relaunch.
